

IN THE SPECIFICATION

Please replace the last paragraph on page 3 with the following rewritten paragraph:

---

AI -- Thus, what is required is a solution that can enhance copy protection for copyrighted digital content. The required solution should be robust enough to prevent easy circumvention while avoiding the imposition of latency inducing encryption on edge devices. The required solution should provide accountability for the dissemination of copyrighted digital content. The required solution should preserve network resources for use by authorized traffic. The present invention provides a novel solution to the above requirements.--
